EXPERIMENT – 1

Aim: Install Terraform on Windows

1] Download Terraform File for Windows

2] Add Terraform path to system Environment-variables

3] Verify Windows Terraform Installation.

i) Open a new command-prompt window.

ii) Enter the command to check the terraform version: terraform -version

```
C:\Users\kamdi>terraform -version
Terraform v1.6.6
on windows_386

C:\Users\kamdi>
```
