LAB FILE

NAME: Kartikay Bisaria
SAP ID: 500096303
BATCH: B3
**SUBMITTED TO:** Dr. Hitesh Kumar Sharma
**SEMESTER:** VI
ENROLLMENT NO.: R2142211032

EXPERIMENT 1:

INSTALL TERRAFORM ON WINDOWS

1. Go to the Download Terraform page.

2. Select the correct version according to your system requirement.

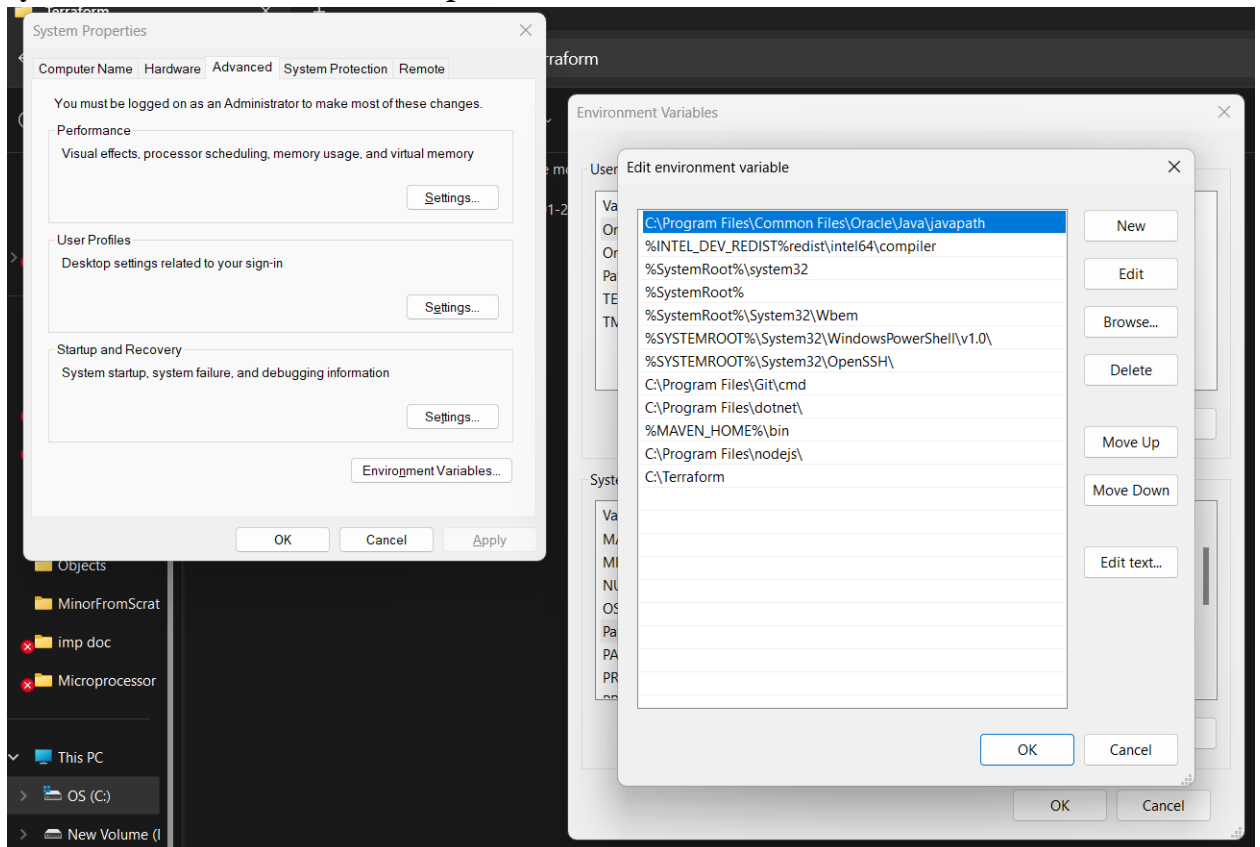

3. A zip file will be downloaded

4. Save the file in C drive and copy the path to clipboard

5. Search ***Edit system environment variables*** in Start menu and open Environment variables

6. Click the Environment variables button and select PATH in user variables ans systrem variables to add a new path.

7. Open new command prompt window and type: ***terraform -version***

```
C:\Users\ASUS>terraform --version
Terraform v1.6.6
on windows_386

Your version of Terraform is out of date! The latest version
is 1.7.2. You can update by downloading from https://www.terraform.io/downloads.html

C:\Users\ASUS>
```
